- 3.2 Cookies may be either "persistent" cookies or "session" cookies: a persistent cookie will be stored by a web browser and will remain valid until its set expiry date, unless deleted by the user before the expiry date; a session cookie, on the other hand, will expire at the end of the user session, when the web browser is closed.
- 3.3 Cookies do not typically contain any information that personally identifies a user, but personal information that we store about you may be linked to the information stored in and obtained from cookies.

## Drafting notes for free cookies policy

Both UK and EU law require that websites making use of cookies (that is, most websites) make certain disclosures about those cookies. This policy is intended to help you with those disclosures. It is a more detailed version of the basic cookies policy incorporated into our privacy policy template. Depending upon your circumstances, you may need to supplement the policy with consent procedures.

This is a template cookies policy, designed to help website owners comply with the EU and UK laws concerning the disclosure to users of information about cookies used on a website.

See: Regulation 6 of The Privacy and Electronic Communications (EC Directive) Regulations 2003 and the amendments thereto in The Privacy and Electronic Communications (EC Directive) (Amendment) Regulations 2011.

Under the "new" cookies law, the use of many cookies will require the express consent of the user.

In addition, where the use of cookies involves the processing of personal data, data protection law requires the disclosure of information about such processing to data subjects.
